

**VIIth International Symposium on
Coronaviruses and Arteriviruses**

Parador de Segovia, Segovia, Spain

May 10 to 15th, 1997

Topics: Meeting participants will review the unique features of coronavirus and arterivirus replication, including genome organization, transcription and translation strategies, the importance of RNA recombination, immune response, and selected aspects of the most important coronavirus and arterivirus infections. Keynote presentations on related topics will be made by selected speakers including: P. Alquist, V. Racaniello, E. Hunter, G. Smith, M. Liu, and E. Domingo.

Organizers: Luis Enjuanes, Madrid, Spain
Stuart G. Siddell, Würzburg, Germany
Willy Spaan, Leiden, The Netherlands

Information: Luis Enjuanes, Centro Nacional de Biotecnología, CSIC, Department of Molecular and Cell Biology, Campus Universidad Autónoma, Cantoblanco, 28049 Madrid, Spain. Phone & Fax: 341-585 4555; E-mail: Lenjuanes@samba.CNB.UAM.ES

Sponsors: Comisión Interministerial de Ciencia y Tecnología (Spain), European Union Biotechnology Program, Centro Nacional de Biotecnología, Consejo Superior de Investigaciones Científicas, NIH, Sociedad Española de Virología, Society for General Microbiology, FEMS, EMBO, Comunidad de Castilla y León, Segovia Town Hall, Ingenasa, Cultek, Fort Dodge-Cyanamid, Boehringer Mannheim, Bio-Rad, Glaxo, Merck Sharp & Dome, Boehringer-Ingelheim, Telstar, Sigma, Izasa, Pharmacia, Amersham, Eurolabo, Heraeus.
